

HORUS

FLIGHT HELMET SYSTEM

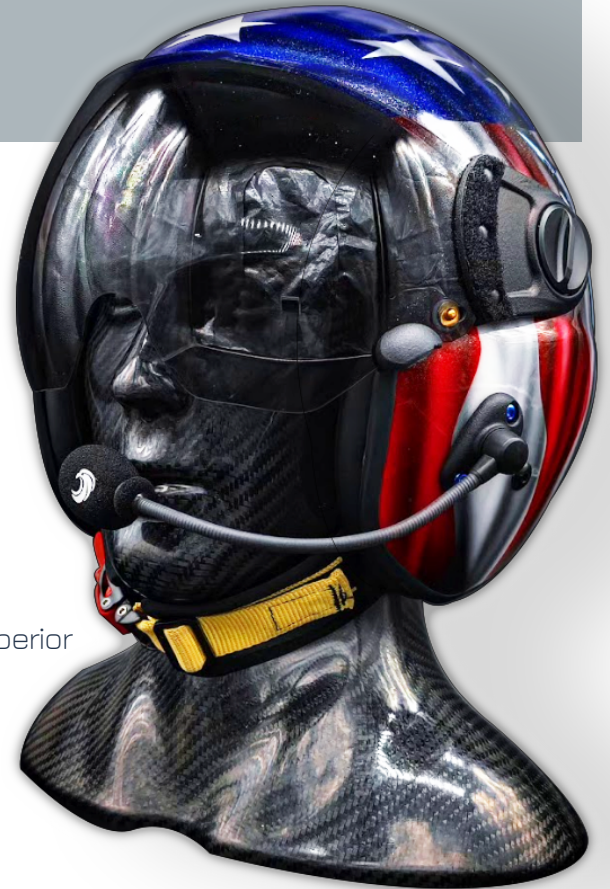

HH-77/RT

Rotary Wing Aircrew Helmet Systems

ADAPTABLE HIGH-EFFICIENCY PERFORMANCE

Prepare your pilots for every mission with our advanced Horus flight helmet systems. Designed with modular, scalable features, Horus helmets provide protection against debris, and lasers, incorporating facial, ballistic, and optical safeguards

Optimal Stability

The Horus Integrated Interior customized assembly offers superior stability and comfort during long extended missions.

Complete Head and Respiratory Protection

The HH-77/RT seamlessly integrates with the optional Horus The Horus HBM-7 /P Shamal Oxygen Mask system delivering comprehensive head and respiratory protection for aircrew.

Maximum Fit and Comfort

For optimal fit and comfort during extended missions, the HH-77/RT weighs under 1 kg. (excluding NVGs) and features the Horus Coolmax LINER, a cutting-edge, lightweight helmet liner. Additional comfort is provided by Horus's soft Gel ear seals assemblies to complete the helmet comfort package provided

Advanced Eye Protection

The HH-77/RT comes with dual visors for enhanced protection in various conditions, including standard day and night visors, with optional high-contrast, gradient, and laser visors.

NVG Quick Disconnect

Horus's innovative NVG mount enables rapid attachment and detachment of night vision goggles, ensuring safe and effortless operation. It provides the stability and functionality of standard NVGs while optimizing eye relief to enhance the field of view.
